

Houses

What is a normal house in the UK?

Most households live in houses. One in five live in flats, most commonly in blocks of three storeys or less. Some groups are more likely to live in high rise flats than others.

Who do you live with?

- What are the advantages and disadvantages of living with those people / on your own?
- Do you enjoy where you live?

What makes a house a home?

Home is somewhere comfortable and warm.
House refers to a building where people live.

The best interiors are a genuine reflection of their inhabitants.

“Home is where my family is. I need my favourite furniture and art – and it’s important they have space in our home – but home will always be a place where I can rest, laugh and spend time with my family.”
